BLÜCHER® System-X transition adaptor

- The easy transition coupling connection to other steel piping systems

These new adaptors can be used to connect the BLÜCHER® EuroPipe system with other steel/ stainless steel piping systems made according to the standard EN1124-3 (System X).

It is especially for refurbishment projects these adapters may be needed, when replacing old pipe systems (e.g. black water, gray water or outside drainage systems). This is the ideal solution as the jointing still is a push-fit solution, which gives a much faster installation time compared to a coupling solution or a welded solution.

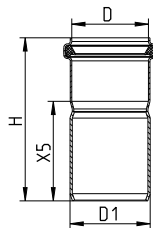

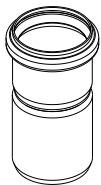

As simple as that ...

BENEFITS:

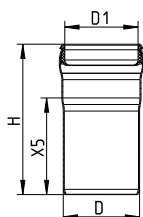

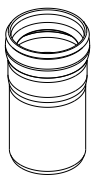

- The BLÜCHER® EuroPipe system can easily be connected to other pipe systems by using System-X transition adaptor.
- Fast installation due to push-fit connection
- Both for vacuum and gravity systems
- Ideal for refurbishment/refit projects
- Material AISI 316L

SYSTEM-X TRANSITION ADAPTOR WITH BLÜCHER SOCKET / SYSTEM X SPIGOT

Type no.	D	D1	H	X5
859.040.042 S	Ø40	Ø42.4	87	45
